

U.S. – MEXICO CROSS BORDER. UTi INTRODUCES AN EXPANDED IMPORT/EXPORT LOGISTICS PROGRAM.

As a leading supply chain solutions provider with a client-centric focus, along with our U.S./Mexico border expertise, UTi has expanded its logistics capabilities for companies importing and exporting to and from Mexico.

Today, with NAFTA continuing to grow, we've seen more U.S. companies looking for near shoring options, trading partners, and manufacturing closer to home. In addition, surface transport needs have increased along with increases in related trade between the U.S., Canada and Mexico, while Texas leads all states in surface trade with Mexico.

As a result, UTi has combined transportation and freight forwarding services with brokerage services to provide a seamless flow of goods to and from Mexico. Throughout the shipping process, UTi's U.S. Brokerage and in-house Mexico Brokerage services provide visibility, control and monitoring, ensuring goods are delivered when and where you need them.
